HORIZON

WE BUILD FARMS.

Penner Farm Services is a leading provider of livestock equipment, supplies, and services. Since 1956, hog, poultry and dairy producers have relied on Penner Farm Services to provide their entire scope of automated equipment for efficient farm management.

DESIGN-BUILD

With over 50 years of experience in the Poultry industry, our team is well-versed in barn layouts for optimal ventilation, animal wellness, efficient production and more. We will explore your current operation, listen to your needs and wishes, and come up with a plan. We don't stop there - our team is equipped to walk through the permitting process, construction, installation and startup.

EQUIPMENT

Our poultry team is here to walk you through a wide array of equipment options for your barn, whether it is new housing systems, egg packers, ventilation solutions and more. We install, setup, service and train your staff on all the products we offer.

SERVICE

Regular maintenance, scheduled service or emergency service - the service team at Penner Farm Services is available 24/7, 365 days a year. But we aren't just here for equipment service and maintenance - our team is here to reduce the stress of day-to-day operations by providing consultation and on-site farm management support related to production efficiencies.

SUPPLY

Horizon Livestock & Poultry Supply is the supply division of AgriHub Inc. Offering farms of all sizes the day to day consumables needed to keep your operation running smoothly. We inventory farm apparel, hardware, tools, animal handling items, household products, medications, nutraceuticals and more.

01

HOUSING

enriched housing systems
aviary housing systems

Valli Enriched and Aviary Cage systems top the industry with simplicity in terms of operation and maintenance!

01 VALLI Enriched Housing Systems

- Available in multi-tier configurations
- With or without intermediate catwalk
- With or without air tube
- Low mortality
- External guardrails optional (provide support for inspection trolleys, can be adjusted in height to reach all tiers)
- Multi-tier colonies with possibility of intermediate catwalks from 3 to 12 tiers/floors
- Egg collection by Elevators or Lift System: automatically runs at timed intervals for even distribution across the belts
- Design oriented to maximize animal welfare

Space COLONY 52 - 56 - 60 - 64:

Main feeding system via Travelling Hoppers or Chain Feeders, combined with additional Scratch Litter Feeding System.

Space COLONY 36+36 - 43+43:

Main feeding system via Travelling Hoppers or Chain Feeders, combined with continuous additional Scratch Litter Feeding System.

Space OUT:

Singular feeding system via flat chain inside the colonies, accessible from both sides

02 VALLI Aviary Housing Systems

- Each model measures 3008 mm (118 7/16") in length
- Two drinker lines per tier
- One feeding system via flat chain accessible by both sides inside the colonies
- Two egg belts 140 or 250 mm wide per tier
- Models by two and three tiers or in multi-tier configuration with intermediate catwalks
- Provided with external tube rail to protect egg channels from trolleys running along the sides
- Dimmable LED light system in corridors
- Access ramps available
- With or without manure drying system tube (no increase in overall width)

*"Quality is a life style, not
an advertising formula
or abstract concept."*

02

FEEDING, WATERING, PROCESSING

Total Care. Always There.

03 feedline delivery systems

Cumberland feed systems are top of the line, offering pan or chain feeding systems. The GSI Flex-Flo and The ChoreTime Flex Auger are our most popular feed delivery methods.

04 water delivery systems

PFS carries the world-class Lubing watering system, which is the standard for Valli Cage Systems.

05 feed/water controls

The United Agri Systems Controller provides reassurance along with superior performance for housing, feeding and watering systems. These in-house built controls are created with your poultry operation in mind.

06 feed storage

Whether it's Cumberland corrugated steel or PW Aire poly bins you are after, we offer a solution for any feed storage need. To check your feed levels, consider an Agrimesh SeeLow Bin sensor for immediate, accurate readings.

07 egg packing/stacking

We are proud to offer the Vencomatic line of equipment to our Layer/Breeder Farms, featuring the Prinzen Egg Packer(99.7% pts down), Palletizer, and Pallet Loader for efficient, accurate and gentle packing, stacking and loading.

08 end of flock equipment

Our offerings for end of flock solutions varies from province to province, dependant on the regulations. Equipment such as incinerators, composters or euthanization chambers are some options offered by Penner Farm Services.

03

HEATING/COOLING, LIGHTING, CONTROLS

Total Care. Always There.

Our equipment lineup offers superior operation, durability and reliability, removing worry from your Poultry Operation.

PENNER FARM SERVICES
